—OF—

LOGAN NURSERIES

Wilson & Carlisle, Prop'rs.

FALL AND SPRING, - - - 1891-2.

OFFICE AND SHOW GROUNDS, MAIN ST., ON ISLAND.

LOGAN, ✣ ✣ ✣ ✣ ✣ UTAH.

We take pleasure in presenting herewith our Second Annual Catalogue

Buyers will do well to consider that we are located near the northern boundary of Utah, in a high altitude, calculated to produce as hardy trees as can be grown anywhere.

To Our Customers.

PLEASE READ BEFORE MAKING OUT ORDER.

Send in your orders early, to insure prompt attention.

All orders should be written out plainly, with name, post office address and shipping directions. We furnish order sheets on application.

Where particular varieties are ordered, we fill accordingly as far as possible, but reserve the right to substitute other similar kinds for those we may happen to run short of.

Should any error or shortage occur in filling orders we would like to be notified at once, that we may make amends. We are anxious to give our patrons the full worth of their money and to be worthy of their confidence.

All orders from unknown parties must be accompanied by the cash. Ten per cent. discount will be allowed from these prices for cash before shipment.

PRICE LIST.

APPLES.

We call special attention to our large stock of apples of the choicest varieties.

2 and 3 year trees, 4 to 6 feet; each, .30, doz. $3.00, hundred, $20.00.

VARIETIES.

SUMMER.—Red Astrachan, Sweet June, Sops of Wine, Oldenburg, Strawberry, etc.

FALL.—Wealthy, Fameuse, Haas, Pewaukee, Maiden's Blush, Alexander.

WINTER.—Janet (or Neverfail), E. G. Russet, Northern Spy, Red Canada, W. W. Pearmain, Talman's Sweet, Baldwin, Jonathan, Ben Davis, Winesap, Grimes' Golden, Yellow Bellfower and others.

NOTE—Five cents per tree extra for Ben Davis.

SPECIAL VARIETIES.

2 and 3 year. No. 1, each, 40; doz. $4.00; hundred, $25.00.

Yellow Transparent, Salome, Red Beitigheimer, Mo. Pippin, etc.

CRAB APPLES.

2 and 3 year No. 1, same price as special apples.

VARIETIES.—Whitney, Hyslop, Transcendant, Sylvan Sweet, Quaker Beauty, Golden Beauty and others.

NEW APPLES.

RUSSIAN APPLES, worthy of trial: Antonovka, Enormous, Hibernal, Titovka, Switzer, Imperial Citron, Mushroom, Moscow Pear and others, 3 year No. 1, each 40c.; doz. $4.

CACHE VALLEY SEEDLINGS, now offered for the first time.

BEN DAVIS, JR. A seedling of Ben Davis originated by J. G. Carlisle of Logan City. The tree is a strong, healthy grower and hardy. Fruit in color and keeping qualities like its parent but of superior quality and more the shape of King of Topkins. Price, $1. each.

HALL: Similar to Maiden's Blush in appearance. A late winter apple of good size and fine quality. Free, hardy and healthy. Originated by the late Chas. Hall of Paradise and valued by him as the best of a number of good seedlings. $1 each.

PEARS.

5 to 7 feet No. 1, each, .50; hundred, $40.00.

VARIETIES.—Flemish Beauty, Clapp's Favorite, Winter Nelis, Howell, Kieffer, Goodale, Bartlett.

NATIVE PLUMS.

4 to 6 feet No. 1, each, .40; doz. $4.00; hundred, $25.00.

VARIETIES.—Wolf, Wild Goose, New Pottawatomie, Miner. DESOTO, each, .50; hundred, $40.00.

EUROPEAN PLUMS AND PRUNES.

4 to 6 feet No. 1, each, .50; hundred, $40.00.

VARIETIES.—Pond Seedling, Lombard, Jefferson, Coe's Golden Drop, Bradshaw, Gen. Hand, Green Gage.

PRUNES.—German, Silver, Hungarian, Bulgarian, Italian, French and Golden.

CHINESE AND JAPAN PLUMS.

Botan or Abundance, Ogan and Prunus Simoni; each, .50; doz. $5.00.

CHERRIES.

4 to 6 feet No. 1, each .50; doz. $5.00; hundred, $35.00.

SOUR VARIETIES.—Early Richmond, Eng. Morello, Dyehouse, Olivet, Ostheim.

SWEET VARIETIES.—Black Tartarian, Black Eagle, Napoleon, Gov. Wood.

APRICOTS.

Russian, 4 to 6 feet, each, .40; doz. $4.00.

Alexander, J. L. Budd, Catherine.

Chinese, "Acme" or "Shense" a few at $1.00

" 1 year ..... .60

PEACHES.

	Each.	Doz.	100
4 to 5 feet	.30.	$3.00	$20.00

A number of the best varieties.

Swenson's Peach	.50		

NUT TREES.

" " 2 year	2.00
Palmetto, 1 year	2.00

RHUBARB,

Strong divided Roots, per dozen, $1.50.

SHADE AND ORNAMENTAL TREES.

Carolina Poplar.

The Carolina is without doubt the most valuable poplar yet introduced for a shade tree. Being the strongest grower we have and forming a handsome round top; it pleases wherever it is seen. We have the largest stock in Utah. The Carolina and Bolleana Poplars, unlike the Canadian and Silver Poplars are hybrids and do not throw cotton.

	Each.	100
12 to 15 feet (selected heavy)	50	$35.00
10 to 14 " (large)	35	25.00
8 to 10 " (good)	25	18.00

Bulbs and Roots.

Dahlia,
Gladiolus,
Hyacinths,
Tulips,
Narcissus,
Crocus,
Bleeding Heart,
Hollyhocks (fine double)
Pansies,
Carnations,
Pinks,
China Pinks,
Daisies,
Sweet Williams.

Price from 5c. to 50c:

General bee supplies at lowest prices. Our new hive is growing in favor. See it before purchasing any other.

Cut Flowers.—Designs for funerals, boquets, etc., to order.

Vegetables in season at wholesale or retail.

Landscape Gardening.—We design public parks or private grounds, make lawns and walks, plant hedges and ornamentals and guarantee satisfaction.

Seeds.—We make the seed trade an important branch of our business and carry the largest stock north of Ogden. We test our seeds and guarantee their germinating qualities. Send for catalogue.

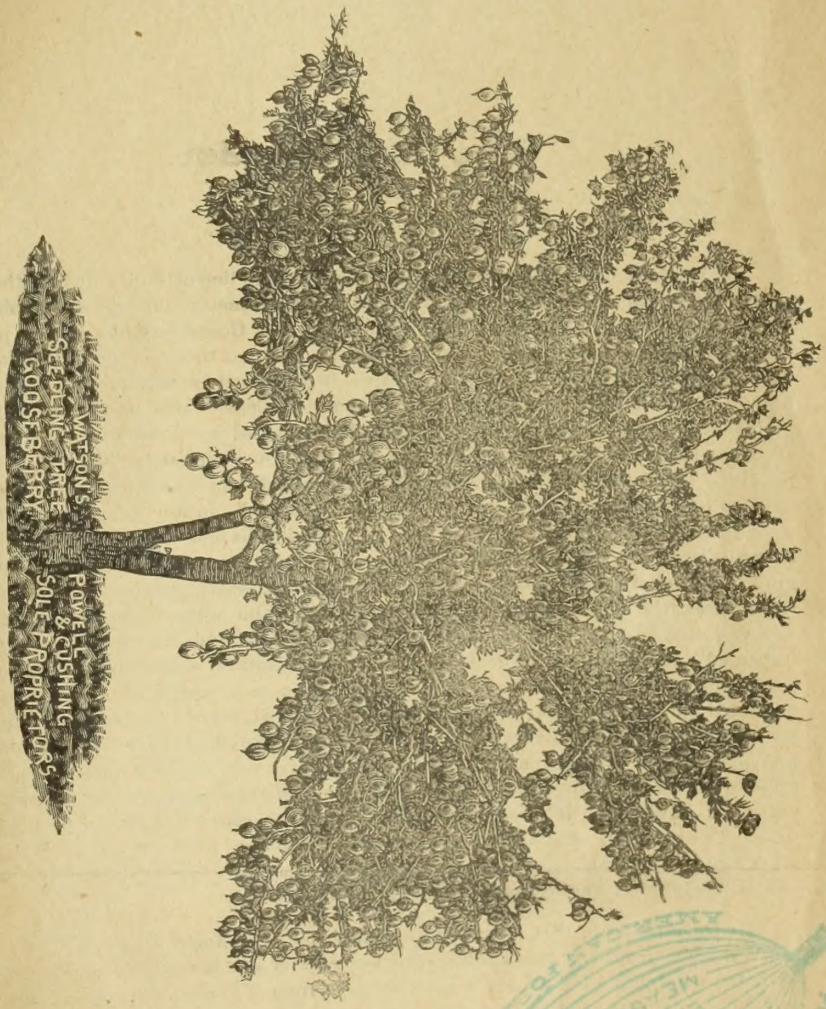
THE WONDER OF THE AGE!

WATSON'S SEEDLING TREE GOOSEBERRY



THE ORIGINAL TREE, 11 years old.—A true copy of a photograph taken June 30, 1891, after part of the fruit had been picked, there still being over one bushel of fruit on the tree.

MAMMOTH, PROLIFIC, MILDEW PROOF, TIME TRIED AND CAREFULLY TESTED.

NONE GENUINE WITHOUT OUR PRIVATE SEAL.

THE GOOSEBERRY CONTEST.

An Historical Sketch of the Origin of "WATSON'S SEEDLING TREE GOOSEBERRY,"

The Utah Wonder.

Perhaps nothing has been discovered in the line of fruits during the present century that has awakened such a profound interest among nurserymen, gardeners and fruit growers as will the new Utah Wonder. The Gooseberry has in the past fully demonstrated its usefulness and profitableness, and has become a general favorite with fruit growers. The difficulty has heretofore been to get a variety that was free from mildew, mold and rot. Nurserymen have puzzled their brains in trying to invent a perfect berry, and, while some of the smaller varieties have proven themselves, nearly all of the large so-called mildew proof berries have not withstood the test of time. It remained for Utah, the Territory noted for its varied and wonderful natural resources, to carry off the grand prize in the "Gooseberry Contest." In the early days of Utah, fruits were scarce, and until the last few years all trees, shrubs and vines had to be shipped in from the east and prices were high. The people were poor and therefore undertook to grow their own stock; the many superior seedlings, pears, peaches, apples and other fruits attest the natural adaptability of the soil for the propagation and originating of fine varieties. In the summer of 1879, Messrs. William and Andrew Watson, two very respected and prominent gardeners of Provo, Utah, noticed a slender seedling coming up under one of their very common Gooseberry bushes; as a matter of mere curiosity they protected the tender plant and in the summer of 1881, were rewarded by seeing a well formed tree laden with a very superior fruit, such as they had never seen before. They propagated from this tree until now they have over one hundred trees in bearing, and probably several hundred young trees. They have always regarded it as a very superior berry but have kept it mostly to themselves, being content with the profits from the fruit. The original, or parent tree, has been in bearing now for ten years and many other trees for six and eight years, and all of them prove conclusively that this berry is absolutely proof against mildew, mold or rot.

On June 30th, 1891, Messrs. Powell & Cushing, of American Fork, Utah, called at the Watson's home, and being shown this berry, after due investigation closed a contract with the originators for all the wood and stock from the trees, and the exclusive right to handle, advertise, and sell for a term of years. They gave it the name of the originators, "Watson Seedling Tree Gooseberry," and will now for the first time offer a limited number of cuttings and one-year trees to the public, confident that the few who first obtain it will aid to advertise its superior merits. For a more extended description see the written statements of the originators.

Testimonials.

TO WHOM IT MAY CONCERN:

This is to certify that we are the originators of a new and improved variety of Gooseberry which has been named "WATSON'S SEEDLING TREE GOOSEBERRY." This originated from seed in the garden of William Watson in the City of Provo in the year 1879, and has been in bearing every year since the year 1881, in both of our gardens. We have a large number of the trees in bearing, and find them a most prolific bearer; the fruit is very large and uniform in size, there being no small berries discoverable on the trees. In size they run from 1¼ to 1¾ inches in length and from ¾ to one inch in diameter; they are a pale green berry, almost transparent, containing but few seeds, firm, solid and as smooth as glass, and when ripe a light red and almost as large as a plum and of an excellent flavor, ripens middle to last of July. We have grown them for ten years side by side with almost every known variety, and while nearly all other large berries have mildewed or molded, the Watson's Seedling has never shown the first sign of either. The tree stands erect and is as symmetrical as a plum tree. The parent tree, from which the photograph was made, being nearly five feet high. The berries grow in thick clusters along the under side of the branches, often three in a cluster. The foliage is spare and thorns are few. The parent tree had from one to one and a half bushels of fruit on it when photographed, June 30th, 1891, and a good many quarts had then been gathered.

We have made arrangements with Messrs. Powell & Cushing of American Fork, Utah, to handle, advertise, propagate and sell this Gooseberry tree exclusively, and will furnish to them only a certificate of genuineness, and any person except them who offer to sell stock of the same cannot furnish the genuine article.

Dated at Provo City, Utah, this 30th day of June, 1891.

Signed,

Witness:
E. E. DUDLEY.

WILLIAM WATSON.
ANDREW WATSON.

We, the undersigned, citizens of Provo, do hereby certify that we have read the above statement, and are personally acquainted with the signers thereof. They have resided in Provo for thirty years, and are respected and reliable persons, and their statements can be relied upon.

A. O. SMOOT, President, First National Bank.
W. N. DUSENBERRY, Cashier, First National Bank.
J. E. Booth, Mayor, Provo City.
J. R. TWELVES, Cashier, Provo Comc'l Savings Bank.
J. C. GRAHAM, Editor "Daily Enquirer."

What a few of those who have seen it say:

GOVERNOR THOMAS—"Be sure and send me some of those trees."
SECRETARY SELLS—"I also want some of those trees."
COL. MURRAY—"I have heard of the Irishman who wanted to be hung on a gooseberry tree, but this is the first tree I have ever seen."
SALT LAKE TIMES—"A Pomological Prize."
SALT LAKE TRIBUNE—"It reminds one of an orange tree loaded with fruit."
AMERICAN FORK INDEPENDENT—"A Utah Wonder."
GAY LOMBARD, Pres. Bank of American Fork—"I want a dozen to send to my father in Boston."
WATSON'S vs. INDUSTRY: GEO. S. HAYS, a prominent fruit grower of Pleasant Grove, Utah, says:—"Send me four Watson's in place of the 100 Industry I ordered."
Hundreds of others have expressed themselves equally strong.

POINTS OF SUPERIORITY.

Why Watson's Seedling Tree Gooseberry Is the Best in the World.

1. Positively free from mildew, mold or rot, after a thorough test of ten years side of all others.

2. It is the only perfect and natural tree Gooseberry known.

3. It is the largest, most prolific, solid, least acid and most free from seed of any known variety.

Every fruit grower, gardener and family in the United States and Canada should cultivate this variety; as for profit we think it has no equal. It has been fully demonstrated by the originators that this Gooseberry will produce on a five to eight year old tree from half to one and a half bushels of fruit. It sells on the market for one hundred per cent more than common varieties. One acre, 640 trees, of this berry will, at the end of five years, at the lowest estimate, yield returns of $1500 per annum.

We are the sole and exclusive proprietors of this Gooseberry for a term of years, and in order to protect the public from being imposed upon and defrauded by irresponsible and unprincipled agents, who will without doubt offer to sell the same, we propose to sell it only under our private seal. **THE PUBLIC ARE WARNED** that any person offering to sell this Gooseberry without showing a written authority, signed by us, is an imposter, and all stock not delivered under our private seal is not genuine.

We have only a few one year old trees to spare this fall and the price on those will be high, but we can spare a limited number of cuttings at a moderate price per dozen, and our directions for growing, which will accompany them, will, if followed, insure the growth of a large proportion if not all. Mail orders will be sent to any part of the United States or Canada. Orders will be registered and filled in the order received, to insure any this fall you must order early, first come first served.

Write for prices and particulars.

Good Agents wanted in every town in the United States and Canada, to canvass for this Gooseberry.

Address all orders and communications to **POWELL & CUSHING**, Nursery, American Fork, Utah County, Utah, who also handle all kinds of first-class varieties of Fruit, Shade and Ornamental Trees, Vines, Shrubs and Plants; Choice Prune Trees, Niagara Grape and Fay's Prolific Currant, a specialty.
